

Tool Sharpening for Turret Punch Tooling

GVK METALFORMS is proud to introduce its own designed and manufactured Tool Grinding machine that can grind all types of turret punch press tooling. The machine is available with complete fixturing for all types of punches and dies. It is very easy to set up and has a very small footprint and can be placed near your punching machine. A value for money product to give you better tool life and better control over grinding height.

INNOVATIVE METALFORMING TECHNOLOGIES

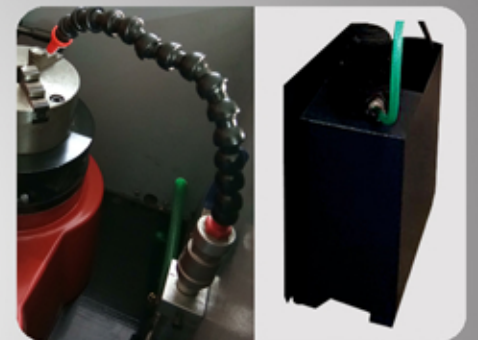

TECHNICAL SPECIFICATION - MODEL - TGM1

Grinding Motor :	1/1.5 HP, 2800 Rpm
Electric Supply :	220/440 volt, 3 Phase, 50 Cycle
Maximum Clearance Over Magnetic Chuck :	3-1/2"
3 - Jaw Chuck :	4"
3 - Jaw Chuck I/D And O/D Jaws :	5" Diameter
Hole In Chuck :	1-1/4" Diameter
Magnetic Chuck :	4-3/4" Diameter
Bench Space :	18"x16"
Shipping Weight	350 Kgs
Standard Equipment :	3-Jaw Chuck, Magnetic Chuck with Swivel, Aluminium Oxide Grinding Wheel
Grinding Wheel Specification :	
Diameter	5.0" Diameter
Material	Aluminium Oxide
Grit	46/60
Optional Equipment	Coolant Tank with pump Demagnetizer

Specifications are subject to change without prior noticed

Demagnetizer (Optional)

Coolant Tank with pump (Optional)

ACCESSORIES

3 - Jaw Chuck

Magnetic Chuck with Swivel

Aluminium oxide Grinding Wheel
