

## Trumpf Laser DIAS III New Ceramic

WELDED  
LAPPED  
"GOLD-PLATED"  
BETTER ENSURE OF RESISTANCE

[WWW.ROLLERITOOLES.COM](http://WWW.ROLLERITOOLES.COM)

- ▶ External brass contact parts are laser WELDED

- ▶ Ceramic support part is LAPPED in order to grant a better dielectric isolation

- ▶ Ceramic contact parts are “gold-plated” for ensure a perfect transmission of the frequency signal between nozzle and sensor

- ▶ Brass component were the nozzle is mounted is Octagonal, this for grant a better and stronger connection with Ceramic parts
